GENERAL SAFETY

The sport of archery must adhere to certain SAFETY RULES. The following is a list of some ideas and suggestions that are not restricted:

RANGE SETUP AND GROUP SAFETY CONSIDERATIONS

- Place the targets in an area completely without danger or at the foot of a small rise.
- Avoid placing the targets in front of a wall; arrows that hit into a wall will be severely damaged.
- If the chosen area presents any sort of danger (car park, neighbouring gardens, public paths, windows) do not hesitate to fix protection netting. (accredited netting – to world archery standards)
- There has to be a zone of 10 meters wide on each shooting side.
- All the archers must be located on the same shooting line.
- All archers must stop shooting if someone enters the shooting zone.
- All archers should shoot at the same time.
- Ensure that no archer is shooting with damaged equipment.
- Ensure that the archers move back several steps after having shot their arrows.
- Never pass in front of a line of archers; neither at close range nor at a distance.

INDIVIDUAL SAFETY CONSIDERATIONS

- All beginners should wear a forearm protector; this piece of equipment helps to prevent injuries and accidents.
- When in the shooting position, the string must be able to pass freely without obstructions. The clothing chosen for shooting should be adapted to this need.
- Do not use arrows that are too short; these can cause serious injuries to the archer if they fall from the arrow rest during shooting.
- Never use damaged bows, strings, or arrows; there is a risk of breakage to the equipment, that may cause injury.
- Never draw back the string and release it without an arrow; there is a risk of breakage to the equipment.
- Never point a bow towards someone, with or without an arrow.
- Never touch another archer when they are in the shooting position.
- Never shoot with the bow horizontally on the shooting line; the span of the bow can disturb other archers.
- Never shoot before everyone has returned to the shooting line.
- Never shoot an arrow vertically; it is impossible to know where the arrow will land.
- Do not stand behind an archer who is in the process of withdrawing the arrows from the target.
- Do not draw back or flex the bow, even without an arrow, while off the shooting line.
- Once on the shooting line, never collect an arrow unless it is possible to reach it with the end of the bow without moving the feet.
- When going to retrieve the arrows from the target, watch out for fallen arrows on the ground and approach the target from the side. Always walk.
- Do not withdraw the arrows from the target at the same time as another archer on the same target; there is a risk of being struck in the face by the arrow nock as the other archer withdraws the arrow.
- No broadheads on arrows to be used

IMPORTANT GROUND RULES APPLYING TO ALL ARCHERY EVENTS

- It is prohibited for archers or officials to consume alcohol prior and during any competition or practice.
- Spectators are not permitted on or near the shooting line – (3 meters behind the line) - during a competition there will be a demarcated area where spectators can view from.
- Archers are not permitted on the shooting line unless participating in an event.
- No Smoking is permitted on the shooting line or range. Only designated areas.
- All cell phones on the line must be switched off or on silent mode.
- All members or individuals associated with Archery in Zimbabwe must ensure and maintain the highest level of professionalism in the sport.

Open Records

- These are the highest scores ever achieved *in Zimbabwe*, regardless of nationality.
- Anyone competing — whether local or foreign — can set an open record.
- Example: If a South African archer shoots a higher score than any Zimbabwean has ever done, while competing in Zimbabwe, that would be recorded as a **Zimbabwe Open Record**.
